From Door Movement to Action

Real-time data. Intelligent insight. Safer buildings.

Parilon

Smart Fire Door Device
Continuously measures door behaviour and condition.

Gateway
Receives device data from multiple doors (up to 50 per gateway).

LAN
(Site network)

Mobile Data Dongle
(4G/5G)

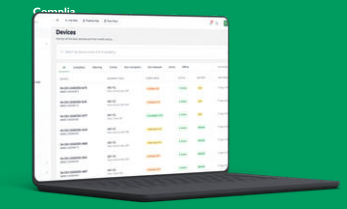

Starlink
(Remote locations)

Flexible Connectivity
Gateway connects via LAN, mobile data dongle or Starlink.

Microsoft Azure

Secure Cloud Platform
Data is transmitted securely to Microsoft Azure, providing a resilient and secure infrastructure.

Parilon Algorithms
Our algorithms interpret the data, identify issues and determine compliance status.

Sensorite Dashboard
Clear, simple dashboards with RAG status for every door.

Instant Alerts
Non-compliance alerts pushed immediately via SMS and/or email with issue details.

MEASURE Capture real-world door performance data

INTERPRET Turn data into compliance insight

ACT Alert, resolve and maintain safety

Built on Microsoft Azure
Sensorite is hosted on the Microsoft Azure cloud platform, using enterprise-grade security, encryption and resilience to keep your data safe.

Reliable and secure
Designed for high availability, with robust data protection and secure communications.

Trusted by the industry
A secure, scalable platform for single sites to nationwide portfolios.
